PROFESSIONAL PROFILE

Junior Software Engineer specializing and constantly learning in backend architecture (Spring Boot, Microservices) and modern mobile development (Kotlin, Jetpack Compose). Proven ability to deliver award-winning, rapid-prototype platforms in high-pressure hackathon environments. Actively seeking a software engineering internship to leverage skills in scalable software design.

EDUCATION

- **University of West Attica** Athens, GR
Integrated Master's in Informatics and Computer Engineering Oct 2022 – Present

TECHNICAL SKILLS

- **Languages & Skills:** Java, Kotlin, C#, Python, MySQL, Linux
- **Backend & Frameworks:** Spring Boot, Hibernate ORM, JWT Security, ASP.NET Web Forms, REST API, Swagger API
- **Mobile Development:** Android, Kotlin, Jetpack Compose, .NET MAUI, Retrofit
- **DevOps & Tools:** Docker, Docker Compose, Git, GitHub, Microsoft Azure, Amazon Web Services
- **AI & Emerging Tech:** Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), AI Integrated Solutions

EXPERIENCE & HACKATHONS

- **LifeHack Athens 2026** Athens, GR
Medical Hackathon (1st Place for Pfizer Track & Microsoft Startups Prize) June 2026
 - **MetNav Platform:** Collaborated in a 5-person team during a 36-hour hackathon to architect and develop a precision medicine AI platform targeting metabolic diseases.
Technologies: Python, FastAPI, LangGraph, PyTorch, XGBoost, Chroma, SQLAlchemy
Links: [GitHub](#)
 - **Recognition:** Secured 1st Place in the Pfizer Track and won the Microsoft for Startups Technology Prize for technical excellence and innovation.
- **ACE AI Hackathon** Athens, GR
Software Hackathon March 2026
 - **Vision-to-RAG Prompt Builder:** Designed and implemented an AI-powered prompt builder utilizing Microsoft Azure's RAG methodology to optimize energy billing analysis and data retrieval for DEI/PPC.
Technologies: Python, LangChain, Streamlit, RAG, Tesseract OCR, Azure AI Search, FastAPI

PROJECTS

- **DiveScore Mobile Application:** Developed a native mobile application to track and provide insights on scuba diving metrics. Built the frontend UI natively using Kotlin and Jetpack Compose, powered by a RESTful API backend engineered with Java and Spring Boot.
Technologies: Kotlin, Jetpack Compose, Retrofit, Java, Spring Boot, Docker, AWS EC2/Microsoft Azure VM, Cloudflare
- **ICE E-SHOP:** Architected and developed the complete backend for a fully containerized E-Shop Application. Designed a secure RESTful API featuring JWT authentication, relational database mapping, integrated Swagger UI, and connected a React frontend.
Technologies: Java, Spring Boot, Docker, MySQL, Hibernate ORM, JWT Auth, JUnit, Swagger UI, React
